

- Focused business unit
- High quality
- Experienced
- Timely results and reporting
- Efficient process

## UK Research Center Profile

Smithers Viscient, formerly Smithers Springborn, works closely with clients to steadily and efficiently bring new products to market while safeguarding the environment. We are a Smithers Group company, a trusted environmental contract research services partner that operates globally.

While we continue to expand our laboratories worldwide to better serve the needs of our clients, we also strive to enhance the efficiency of our operations.

Smithers Viscient has invested in a dedicated facility for highly efficient work. At our UK Research Center, our IT and Process Systems are designed specifically for high throughput, repetitive studies. By passing these efficiencies on to our sponsors, we can fulfill our clients' additional capacity and timing needs while maintaining the high level of quality that you have come to expect from our scientists and regulatory staff.

Our UK Research Center operations are led by an Ecotoxicology Manager with over a decade of experience servicing the industrial chemical and agrochemical industries. Assisting the facility manager, we have a focused team of experienced and enthusiastic staff to ensure that deadlines are met.

## UK Research Center Environmental Toxicology Services

### Aquatic toxicology testing

- Fish acutes
- Aquatic Invertebrate acutes
- Aquatic plants — algae and lemna

### Analytical support for aquatic toxicity testing

- Chromatography
  - HPLC
  - GC
  - GPC
- Spectrometry
  - GC-MS
  - LC-MS
  - GLC-MS/MS

**Smithers Viscient, formerly Smithers Springborn, is a global Contract Research Organization (CRO)** for the crop protection, pharmaceutical, industrial chemical, and consumer products/household products industries. With laboratories located in North America and Europe, Smithers Viscient has performed standard guideline and higher-tiered environmental studies for over 40 years. We conduct studies to satisfy all regulatory requirements globally. Services include ecotoxicology, avian toxicology, environmental fate, metabolism, residue, analytical, and product chemistry, and consulting. Additionally, we perform endocrine testing, including *in vitro* toxicology, *in vivo* toxicology, and *in vivo* ecotoxicology.
